Volume 121 (9) 2008

Cover: A Vero cell containing an F-actin aggregate induced by the actin toxin jasplakinolide. The F-actin cytoskeleton was stained with FITC-phalloidin (green), autophagosomes with GFP-LC3 (red) and endogenous LC3 with anti-LC3 antibodies (blue). See article by Lázaro-Diéguez et al. (pp. 1415-1425).
